

Project Management PLUS

Course Description

A 2-day intensive, interactive course that enables participants to further develop their existing skills in managing projects. Based on the acclaimed "10 Commandments of Project Management" presentation, this course focuses on the **Critical Factors for Success** of any project, using minimum theory, maximum hands-on exercises, case studies and teamwork. It is suited to project managers with already some experience.

Content Outline

The course is based on the standard PMI® methodology and covers the TEN Critical Success Factors of a project, and how to ensure project success. It enables participants to:

Understand the importance of, and how to ensure:

- Project objectives
- Stakeholder expectations
- Intelligent Planning
- Resource availability
- Risk Management
- Communication
- Team and Conflicts Management
- Time and Delays
- Change Management
- Resistance to change

Describe these Project Management principles, techniques and tools and how they apply to the day-to-day management of your projects.

Benefits

The participants walk away with real skills that have been tried and tested in a safe environment; a thorough knowledge of the TEN Critical Success Factors of a project; and new ways of looking at the traditional project management methodologies. Participants will find more confidence in using these new tools and techniques in their workplace.
